Serial No.: 10/814,888  
Filing Date: March 30, 2004  
Docket No.: CCH-001

**Amendments to the Claims:**

This listing of claims replaces all prior versions and listings of claims in the application.

**Listing of Claims**

1. (Currently Amended) A baby blanket, comprising:

a pouch portion having an opening, and wherein the pouch portion has a left side and a right side, wherein the opening is defined in part by a rim, the rim extending in a lateral dimension, wherein the opening has an adjustable circumference, and wherein the pouch portion has an adjustable depth;

a back portion that extends upward from the pouch portion, the back portion having a left side that extends upward from the left side of the pouch portion, the back portion having a right side that extends upward from the right side of the pouch portion;

a hood portion, the back portion extending upward and terminating in the hood portion;

a first arm extension portion that has a first side, a second side and a third side, the first side extending to the left from a location A on the left side of the pouch portion, the second side extending to the right left from a location B on the left side of the back portion, wherein the first arm extension portion tapers as it extends to the left, wherein the location A on the left side of the pouch portion is disposed at least two inches below the rim; and

a second arm extension portion that has a first side, a second side and a third side, the first side extending to the left right from a location C on the left right side of the pouch portion, the second side extending to the right from a location D on the right side of the back portion, wherein the second arm extension portion

Applicant: Cathleen Siok-Syuan Chua

Serial No.: 10/814,888

Filing Date: March 30, 2004

Docket No.: CCH-001

tapers as it extends to the right, wherein the location C on the right side of the pouch portion is disposed at least two inches below the rim,

wherein if the baby blanket is laying flat with the pouch portion collapsed then there is a lateral distance between location A on the left side of the pouch portion and location C on the right side of the pouch portion, wherein the first arm extension portion extends to the left from location A a first distance that is substantially greater than the lateral distance, and wherein the second arm extension portion extends to the right from location C a second distance that is substantially greater than the lateral distance, and wherein the first and second distances are substantially equal.

2. (Currently Amended) The baby blanket of Claim 1, wherein the opening is defined in part by a rim of the pouch, the rim extending substantially in a lateral dimension, wherein the location A on the left side of the pouch portion is disposed at least two inches below the rim, and wherein the location C on the right side of the pouch portion is disposed at least two inches below the rim the first distance is at least twice the lateral distance.

3. (Currently Amended) The baby blanket of Claim 2,

wherein the third side of the first arm extension portion extends from the location A on the left side of the pouch portion upward to the location B on the left side of the back portion, and wherein the third side of the first arm extension portion is at least eight inches long, and

wherein the third side of the second arm extension portion extends from the location C on the right side of the pouch portion to the location D on the right side of the back portion, and wherein the third side of the second arm extension portion is at least eight inches long.

4. (Currently Amended) The baby blanket of Claim 1, wherein the baby blanket is laying flat with the opening in the pouch portion collapsed, such that the first

Applicant: Cathleen Siok-Syuan Chua

Serial No.: 10/814,888

Filing Date: March 30, 2004

Docket No.: CCH-001

arm extension portion is laying flat and extending to the left from the pouch portion, and such that the second arm extension portion is laying flat and extending to the right from the pouch portion.

5. (Original) The baby blanket of Claim 1, wherein the back portion and the pouch portion are formed from a single piece of fabric.

6. (Original) The baby blanket of Claim 1, wherein the back portion, the first arm extension portion and the second arm extension portion are formed from a single piece of fabric.

7. (Currently Amended) The baby blanket of Claim 1, wherein the first arm extension tapers as it extends to the left portion has a substantially triangular shape, and wherein the second arm extension tapers as it extends to the right portion has a substantially triangular shape.

8. (Currently Amended) The baby blanket of Claim 1, wherein further comprising:

a hood portion, the back portion extends upward and terminating in the hood portion, wherein the baby blanket is made of a weatherproof fabric with a fleece lining.

9. (Currently Amended) The baby blanket of Claim 1, further comprising:

means a drawstring disposed in the rim, the drawstring being usable to constrict for constricting the opening.

10. (Currently Amended) The baby blanket of Claim 1, wherein the pouch portion has a depth, the baby blanket further comprising:

means for adjusting the depth of the pouch portion.

Applicant: Cathleen Siok-Syuan Chua

Serial No.: 10/814,888

Filing Date: March 30, 2004

Docket No.: CCH-001

11. (Original) The baby blanket of Claim 10, wherein the means includes a first portion and a second portion, wherein the first portion is detachably connectable to the second portion, the first portion extending from an inside bottom surface of the pouch portion.

12. (Original) The baby blanket of Claim 11, wherein the second portion is connected to one of the back portion and the pouch portion, and wherein the depth of the baby blanket can be reduced by connecting the first portion to the second portion.

13. (Original) The baby blanket of Claim 1, wherein the baby blanket is laying flat with the opening in the pouch portion collapsed, and wherein the pouch portion has a substantially semicircular bottom side that extends from the first side of the pouch portion to the second side of the pouch portion.

14. (Canceled) The baby blanket of Claim 1, wherein the opening of the pouch portion has an adjustable circumference, and wherein the pouch portion has an adjustable depth.

15. (Original) The baby blanket of Claim 1, further comprising:  
a pocket disposed on the back portion.

16. (Canceled) The baby blanket of Claim 1, wherein back portion extends upward from the pouch portion a distance of at least six inches.

17. (Currently Amended) A baby blanket that is operable with a front-worn baby carrier, the front-worn baby carrier being worn by a person, the front-worn baby carrier containing a baby, the front-worn baby carrier having a front side that faces the person, the front-worn baby carrier having a back side that faces away from the person, the baby blanket comprising:

Applicant: Cathleen Siok-Syuan Chua

Serial No.: 10/814,888

Filing Date: March 30, 2004

Docket No.: CCH-001

a pouch portion that contains at least a portion of the legs of the baby; a first arm extension portion that extends from the pouch portion, wraps around at least a portion of the front-worn baby carrier such that the first arm extension portion passes between the chest of the person and said portion of the front-worn baby carrier; and

a second arm extension portion that extends from the pouch portion, extends between the front-worn baby carrier and the person, such that the second arm extension portion passes between the chest of the person and at least a portion of the front-worn baby carrier, the first arm extension portion and the second arm extension portion crossing over one another at a location between the person and the front-worn baby carrier, and wherein the first and second arm extension portions are detachably connected on the other side of the front-worn baby carrier with respect to the person.

18. (Original) The baby blanket of Claim 17, wherein baby blanket has a back portion that extends upward from the pouch portion and that terminates in a hood, the hood facing inward toward the person when the hood is covering the head of the baby, and wherein the pouch portion has an opening into which the legs of the baby extend, the baby blanket further comprising means for adjustably constricting the opening around the baby.

19. (Original) A method for covering a baby with a blanket, the baby being carried in a front-worn baby carrier, the blanket having a pouch portion, a first arm extension portion and a second arm extension portion, the pouch portion having a first mechanism constricting an opening of the pouch portion, the pouch portion having a second mechanism for adjusting a depth of the pouch portion, the method comprising:

using the second mechanism to adjust the depth of the pouch portion; slipping the pouch portion up around the legs of the baby such that the legs of the baby extend into the pouch portion through the opening;

Applicant: Cathleen Siok-Syuan Chua

Serial No.: 10/814,888

Filing Date: March 30, 2004

Docket No.: CCH-001

using the first mechanism to constrict the opening around the baby;  
wrapping the first arm extension portion around the baby carrier such that  
the first arm extension portion extends between a person wearing the baby  
carrier and at least a portion of the baby carrier;

wrapping the second arm extension portion around the baby carrier such  
that the second arm extension portion extends between the person and at least a  
portion of the baby carrier; and

detachably coupling the first arm extension portion and the second arm  
extension portion together at a location on the opposite side of the baby carrier  
with respect to the person.

20. (Original) The method of Claim 19, wherein the pouch portion, the first arm  
extension portion and the second arm extension portion comprise fleece  
material, wherein the first arm extension portion has a substantially triangular  
shape, wherein the second arm extension portion has a substantially triangular  
shape, and wherein the first and second arm extension portions are detachably  
coupled together by tying the first and second arm extension portions together.

21.(New) A method for using a fabric article to cover a baby, the baby being  
carried in a front-worn baby carrier, the fabric article including a pouch portion, a  
first arm extension portion, and a second arm extension portion, the method  
comprising:

slipping the pouch portion of the fabric article up around the legs of the  
baby when the baby is in the front-worn baby carrier;

wrapping the first arm extension portion around the baby carrier such that  
the first arm extension portion extends between a person wearing the baby  
carrier and at least a portion of the baby carrier;

wrapping the second arm extension portion around the baby carrier such  
that the second arm extension portion extends between the person and at least a  
portion of the baby carrier; and

Applicant: Cathleen Siok-Syuan Chua

Serial No.: 10/814,888

Filing Date: March 30, 2004

Docket No.: CCH-001

tying the first arm extension portion and the second arm extension portion together at a location on the opposite side of the baby carrier with respect to the person.

22.(New) The method of Claim 21, wherein the fabric article further includes a back portion that extends upward from the pouch portion, wherein if the fabric article is laying flat with the pouch portion collapsed and the first and second arm extension portions extended and laying flat then the pouch portion has a width, the first arm extension portion extending laterally from the pouch portion a distance that is substantially greater than the width of the pouch portion, the second arm extension portion extending laterally from the pouch portion a distance that is substantially greater than the width of the pouch portion.

23.(New) A method comprising:

orienting a baby blanket such that at least a portion of a front-worn baby carrier is between a back portion of the baby blanket and a person wearing the baby carrier, wherein the baby blanket includes the back portion, a pouch portion, a first arm extension portion, and a second arm extension portion, wherein the back portion extends upward from the pouch portion, wherein the pouch portion has a width, wherein the first arm extension portion has a length that is substantially greater than the width of the pouch portion, wherein the second arm extension portion has a length that is substantially greater than the width of the pouch portion, and wherein the pouch portion has an opening, the opening having an adjustable circumference;

wrapping the first arm extension portion around the baby carrier such that the first arm extension portion extends between the chest of the person and at least a portion of the baby carrier;

wrapping the second arm extension portion around the baby carrier such that the second arm extension portion extends between the chest of person and at least a portion of the baby carrier; and

Applicant: Cathleen Siok-Syuan Chua

Serial No.: 10/814,888

Filing Date: March 30, 2004

Docket No.: CCH-001

detachably coupling the first arm extension portion to the second arm extension portion at a location on the opposite side of the baby carrier with respect to the person.

24.(New) The method of Claim 23, wherein the length of the first arm extension portion is at least twice the width of the pouch portion, and wherein the length of the second arm extension portion is at least twice the width of the pouch portion.
